EDUCATION

Virginia Tech | B.S. in Computer Science | Aug. 2026 - Present

Expected graduation: May 2028

Northern Virginia Community College | Computer Science | Sep. 2024 - May 2026

GPA: 3.55/4.0

EXPERIENCE & RESEARCH

Procentrix | Software Engineering Intern | Jun. - Aug. 2026

- Built a reusable backend template using **Node.js, TypeScript, and SQL Server**, with separate data access and service layers for enterprise applications.
- Implemented REST APIs with authentication, authorization, input validation, and database access safeguards.
- Built a financial risk assessment interface with **React, Microsoft Dataverse, and Fluent UI**, with reusable master-detail components for viewing related financial and firm records.
- Published a Claude Code plugin marketplace to share React/TypeScript scaffolding and Dataverse authentication guidance across the engineering team.

Virginia Tech | Undergraduate Researcher & Group Lead | Sep. 2026 - Present

VTURCS Undergraduate Research Lab | Semantic Search & Matching

- Leading one of three student groups under faculty supervision and developing a semantic search and matching system for student research opportunities.

SELECTED OPEN-SOURCE CONTRIBUTIONS

- **Microsoft PowerToys**: Fixed character clipping and horizontal shifts in Quick Accent by correcting window sizing at fractional display scales. Merged PR #49402.
- **NASA-AMMOS/MMGIS**: Preserved startup logs for debugging by removing a terminal-clearing step; added a regression test. Merged PR #1029.
- **GitType**: Fixed screen redraws after terminal resizing and added regression tests. Merged PR #478.

PROJECTS

Deepwoken.trade | Jun. 2026 - Present

- Built a trading marketplace supporting **1,000+ users**, with reputation profiles, Discord OAuth, Roblox verification, and **PostgreSQL** storage through Prisma.
- Deployed the **Next.js** application using Docker, AWS, Terraform, and GitHub Actions; later migrated hosting to Oracle Cloud and the database to Supabase PostgreSQL.

Aeyori / KarutaBot | Mar. 2026 - Present

- Developed an open-source OCR automation tool with **Python, FastAPI, EasyOCR, Selenium, and PostgreSQL**; built a hosted dashboard with authentication and license management.

LegendWatch | Mar. 2026 - Present

- Built a **Java/Fabric** Minecraft mod with **2,000+ downloads** across Modrinth and CurseForge; implemented event parsing, match state tracking, and visual item indicators.

TECHNICAL SKILLS

Languages: Python, C++, TypeScript, Java, SQL

Frameworks & Data: React, Next.js, Node.js, FastAPI, PostgreSQL, SQL Server, Prisma, Dataverse

Tools & Infrastructure: Docker, Terraform, GitHub Actions, Git, Linux, AWS, Oracle Cloud
